NOTICE

COLLECTION OF GARLANDS FOR RECYCLING

Dear Students,

As part of our college's commitment to sustainability and environmental responsibility, we are initiating a special drive to collect used garlands from the recent Diwali festival. You may also collect garlands from nearby temples and contribute them for this noble cause. These garlands will be recycled and put to creative use by our students.

These collected flowers will be converted into organic compost to promote natural farming practices.

We request you to kindly bring the garlands and other organic waste to the college. Your generous support in this initiative will not only help reduce waste but also instill the values of recycling, conservation, and mindful celebration. Let us work together to make our festivals truly eco-friendly and meaningful.
